

Features

1. Core Platform (MVP)

User Account

- Sign up / Login
- User profile
- Notification settings
- Privacy settings

Dashboard

- Today's Operational Brief
- Calender
- Upcoming events
- Upcoming reminders
- Subscription renewals
- Pending review queue
- Recent activity

Search

- Universal search across everything
- Filters
- Categories
- Date range

2. Capture Engine (Core Innovation)

Native Share Sheet Integration

Users can send:

- WhatsApp messages
- Gmail emails
- Outlook emails
- Telegram messages
- Instagram posts
- Browser pages
- PDFs
- Files
- Images
- Screenshots
- Notes
- Selected text
- Links

to Second.

Text Selection

Users can highlight text anywhere and choose:

Send → Second

Example:

Meeting on Friday at 6.

↓

Highlight

↓

Send to Second

Screenshot Capture

Share screenshot

↓

Second stores:

- Screenshot
- Title
- Description
- Category

File Capture

Save

- PDF
- Ticket
- Receipt
- Invoice

Link Capture

Save

- YouTube video
- Instagram post
- Website
- Article

3. Inbox

Every shared item first enters the Inbox.

Each item shows

- Source
- Preview
- Date
- Suggested category

Actions

- Review
- Archive
- Delete
- Mark as processed

4. Processing Modes

Quick Save

Second automatically saves obvious items.

Example

```
Subscription
↓
Track Renewal
↓
Done
```

Review Immediately

```
Share
↓
Second opens
↓
User decides
```

Review Later

```
Share
↓
Continue using current app
↓
Inbox
↓
Review later
```

5. Intent Detection

Detect

- Meeting
- Reminder
- Subscription
- Birthday
- Travel
- Shopping
- Bill
- Event
- Memory
- Note
- Link

Users can always override.

6. Operational Modules

Calendar

- Create event
- Edit
- Delete
- Month view
- Agenda view
- Upcoming

Reminder Manager

- One-time reminders
- Recurring reminders
- Snooze
- Complete
- Reschedule

Subscription Manager

Track

- Service
- Amount
- Billing cycle
- Renewal date
- Trial end date

Notify before renewal.

Birthday Manager

Store

- Birthday
- Gift ideas
- Reminder schedule

Bills Manager

Track

- Utility bills
- Credit cards
- Rent
- Loans

Travel Manager

Store

- Flight
- Hotel
- Booking
- Check-in reminders

Memory Vault

Store

- Messages
- Screenshots
- Notes
- Documents
- Photos
- Links

Searchable.

7. Dashboard

Today's Brief

Example

Good Morning

Today

Coffee with Sarah

Netflix renews tomorrow

Dad's birthday in 5 days

Passport expires next month

8. Notifications

Notify for

- Events
- Bills
- Birthdays
- Subscriptions
- Tasks
- Travel

9. AI Features (Optional)

AI is only used when requested.

Examples

- Extract dates
- Extract amounts
- Extract names
- Generate title
- Summarize long email
- Suggest category

No continuous AI.

10. Search

Search

- Messages
- Screenshots
- Events
- Memories
- Files

11. Settings

1. Capture Mode: Quick Save, Review Immediately, Review Later
2. Notification preferences
3. Reminder preferences
4. Privacy preferences

12. Privacy

Users can

- Delete everything
- Export data
- Disable cloud sync
- Store locally only
- Control connected services

13. Future Features

AI COO

Daily briefing

Weekly briefing

Monthly briefing

Home Screen Widgets

- Today's Brief
- Upcoming reminders
- Inbox count

Desktop Dashboard

Large wall display

Voice Capture

“Second, remember this.”

Smart Watch

Quick capture

Shared Spaces

Family

Partner

Team

Browser Extension

One-click save from web pages

Email Plugin

Save directly from inbox

Features I would prioritize for the MVP

Out of all of these, I think only these are essential:

1. Native Share Sheet integration (messages, text, screenshots, links, files)
2. Inbox with Review Later workflow
3. Quick Save / Review Now / Review Later modes
4. Intent detection for the first five categories (Meeting, Reminder, Subscription, Birthday, Memory)
5. Calendar
6. Reminder Manager
7. Subscription Manager
8. Memory Vault
9. Universal Search
10. Today's Operational Brief

Everything else can be layered on later. These ten features are enough to demonstrate the core value proposition: **Second is the trusted operational layer that captures important information wherever it appears and helps users organize it without forcing them into another productivity system.**
