

Functional Requirements

FR-1 User Account Management

The system shall allow users to:

- Create an account.
- Log in and log out.
- Manage their profile.
- Configure notification preferences.
- Configure privacy preferences.

FR-2 Share to Second

The system shall allow users to share content directly from supported applications using the native operating system share sheet.

Supported sources include:

- Messaging apps
- Email apps
- Photos
- Browser
- Files

FR-3 Content Capture

The system shall capture the shared content and preserve:

- Original content
- Source application
- Timestamp
- Optional metadata
- User-added notes

FR-4 Content Classification

The system shall identify the type of shared content.

Supported categories include:

- Reminder
- Calendar Event
- Subscription
- Birthday
- Memory
- Note

Users shall be able to manually change the detected category.

FR-5 Information Extraction

The system shall extract structured information when available.

Examples:

Meeting

- Date
- Time
- Location
- Participants

Subscription

- Merchant
- Amount
- Billing cycle
- Renewal date

Birthday

- Person
- Date

FR-6 Memory Vault

The system shall allow users to:

- View saved items
- Edit items
- Delete items
- Archive items
- Search items
- Filter items by category

FR-7 Calendar Management

The system shall:

- Create calendar events
- Edit events
- Delete events
- Display upcoming events
- Display past events

FR-8 Reminder Management

The system shall allow users to:

- Create reminders

- Edit reminders
- Snooze reminders
- Mark reminders as complete
- Delete reminders

FR-9 Subscription Management

The system shall:

Store

- Service name
- Amount
- Billing frequency
- Renewal date

Notify users before renewal.

Allow users to:

- Edit subscriptions
- Delete subscriptions
- Mark subscriptions as cancelled

FR-10 Dashboard

The dashboard shall display:

- Today's operational brief
- Upcoming reminders
- Calendar events
- Subscription renewals
- Recently saved items

FR-11 Search

The system shall allow users to search across:

- Memories
- Reminders
- Calendar events
- Subscriptions

FR-12 Notifications

The system shall notify users for:

- Upcoming events
- Birthdays
- Reminder due dates
- Subscription renewals

FR-13 User Control

The system shall allow users to:

- Edit extracted information
- Delete stored information
- Restore archived information

FR-14 Privacy

The system shall only store information that the user explicitly shares.

The system shall never automatically monitor:

- Messages
- Emails
- Photos
- Files

without explicit user action.

FR-15 AI Assistance

AI shall only be used when required for:

- Understanding shared content
- Extracting structured information
- Generating optional summaries

AI shall not continuously process user data.

Requirements Traceability Matrix (RTM)

Requirement	User Need	Feature	Test Case
FR-2	Save information with minimal effort	Share to Second	Verify content can be shared from supported apps
FR-5	Avoid manual data entry	Information Extraction	Verify date, time, and amount are extracted correctly
FR-9	Never miss recurring payments	Subscription Manager	Verify renewal reminders are triggered
NFR-5	Maintain user trust	Privacy Controls	Verify no data is captured without explicit sharing

An RTM keeps every requirement tied back to a real user need and makes later testing much easier. For a portfolio project, it's a strong way to demonstrate a structured software engineering process.
